Cooking Up Better Lives – in partnership with your local equipment and supply dealer – has donated more than half a million in equipment and supplies to non-profits across the nation as well as Haiti, Honduras and Mexico.

In 2010, the inaugural Better Lives Makeover took place in Houston, TX, with more than \$200,000 in equipment, supplies, design and installation being donated to The Bridge women and children's shelter. Now, *Cooking Up Better Lives* is pleased to announce its **2011 Better Lives Makeover – Urban Peak in Denver, CO**. Urban Peak helps homeless youth and those at risk of becoming homeless overcome real life challenges and become self-sufficient adults. A new kitchen will annually serve hot meals to more than 2,000 unduplicated visits. The kitchen will also be used for job readiness programs, independent living skills, teamwork, and more. Visit www.urbanpeak.org to learn more.

If you have inventory you wish to donate to this project or know of a worthy group who can benefit from future projects, please visit www.cookingupbetterlives.org and click "What You Can Do".

Better
Lives

Look for this eco-friendly logo throughout the flyer. Products shown with this logo have "green" features, such as saving water or energy. This useful information will help explain the importance of "going green." Remember "going green" is not only important for environmental reasons, but also a great way to market your company and save on operating costs! Consumers are becoming more conscious about products and services that reflect the growing eco-friendly movement. Discover why "going green" will benefit the environment and become an important marketing tool for your company!

Save Energy - Become aware of your energy consumption and learn how to manage it efficiently. Purchasing energy efficient equipment will help conserve energy and save your company money.

Save Water - As water becomes more scarce, water utilities are forced to increase the price and that means wasting water is bad for your bottom line. Simple changes like fixing a leaky faucet can save you hundreds of dollars per year!

Reduce, Reuse, Recycle - Reducing your food waste will greatly reduce your environmental impact. Reuse food by donating it to local charities or consider contributing it to your local compost site. Recycle fats, oils and grease (FOG) for biodiesel use.

Control Waste - Plan ahead to avoid over-production and to reduce the quantity of expired items. Use reusable products wherever possible. When purchasing disposables, consider eco-friendly items or portion control options.

Educate Your Staff - Establish an environmentally friendly program for your employees. There are many tools online to help you create the right kind of program for your company. Commit to making lasting changes that will have a real environmental impact.

This flyer is printed on FSC® certified paper. In order to use the FSC® logo as an "environmental claim" on paper, the product must have flowed through the FSC® "chain-of-custody" from the FSC®-certified forest, to a paper manufacturer, merchant, and finally printer who have FSC® chain-of-custody certification. www.fsc.org

Build Your Pizza Shop!

We are here to help you start up your business or increase your business with new clientele. With our expertise, your business will grow quickly and more efficiently.

Talk to one of our sales representatives today and they will guide you in the right direction. Let us connect you to the right products and people!

We are all linked. Let's grow stronger together!
